

maximex: Data management made easy for IBM Maximo

maximex
DATA MANAGEMENT TOOL

SPIE, gemeinsam zum Erfolg

REVOLUTIONIZE YOUR IBM MAXIMO DATA MANAGEMENT WITH MAXIMEX!

maximex, formerly known as Maximo Data Manager, is the world's leading solution for easy and efficient data management in IBM Maximo and IBM Control Desk. With maximex, you simplify time-consuming manual processes and save valuable resources when preparing and importing data into your EAM system using Microsoft Excel. The tool enables **cost savings of up to 40%** during system implementation and operation by increasing efficiency.

Our solution is easy to use and fully integrated with IBM Maximo. Simply install maximex on your IBM Maximo or ICD. Intuitive operation is accessible to your administrators and other key users after a single web session. It supports IBM Maximo standard and additional applications, as well as add-ons and industry solutions. The tool is fully integrated with your Maximo application, respecting permission settings and existing business logic.

In addition to importing and exporting data, Maximex offers other value-added features. In addition to import/export quality-of-life functions, such as the creation of download templates, it enables secure and simple execution of mass changes and deletions, as well as system-wide changes to key attributes. We continue to develop the tool based on our customers' needs and add functionality as needed.

The product is used by many companies in all industries. Two out of three leading car manufacturers in Germany have been successfully using maximex for their system administration for many years. Our customers have found that the cost of the Data Manager pays for itself in less than 12 months. The fair price structure is based on the size of the system and the number of users in the entire system. This means that even small organizations can take full advantage of this powerful tool.

Contact us now at sales@rodias.de to take your data management to the next level with maximex!

YOUR BENEFIT

- Savings of 40% on average of implementation and operating costs
- Improved data quality
- Self-administration due to simple user interface
- Avoidance of manual work
- No transfer errors due to data import
- Easy import of Excel data
- Flexible data exports via Excel templates
- Simplified data exchange with other systems / organizations
- Secure processing of large amounts of data with minimal system load
- Full system integration (observance of business logic and authorization concept)

We use Data Manager for the setup of all kinds of data in our IBM Maximo-based maintenance management system CORMAP, especially for importing maintenance plans and ACM data structures. It is reliable, traceable, easy to use and it saves time and money."

Gabriele Assmann,
Siemens Mobility GmbH

DATA MANAGEMENT TOOL

”

We have been successfully using the Data Manager in Maximo for many years. It helps us import data and keep it up-to-date. This tool is very reliable. It improves our performance and reduces operating costs.”

Thomas Stachowitz,
IBM Maximo Systemadministrator at BG Klinikum Hamburg
